

**PUBLIC NOTICE**  
For  
Air Quality Operating Permit  
for Monument Compressor Station of DCP Midstream

DCP Midstream at 370 17th St, Suite 2500, Denver, CO 80202 has submitted an air quality operating permit application to the New Mexico Environment Department (NMED) for an air quality operating permit for its Monument Compressor Station. The owner of this plant is DCP Midstream. The exact location of the facility is at latitude 32 deg, 37 min, 22.8 sec and longitude -103 deg, 15 min, 20.88 sec. To aid in locating this facility, the approximate location is 0.5 miles east of Monument in Lea County. This application file has been assigned an Operating Permit Number P059R1M1 and TEMPO Agency Interest ID No. 593.

The plant previously received an air quality construction permit and is in operation. The main purpose of the plant is to compress natural gas through underground natural gas pipelines using reciprocating natural gas fired engines.

This operating permit application is for a minor permit modification. Per 20.2.70.401.C.(4) NMAC, this permitting action involves incorporating changes to the TV permit that were authorized in the NSR permit, including revising permitted emissions for the emergency flare, compressor blowdown events, fugitives, and condensate storage tanks; correcting transcription errors; and correcting serial numbers for two engines.

The emissions, as established in NSR Permit 123M5, and brought forward into this permit are as follows. Parentheses note changes in emissions from previous operating permit action – P059-R1; emissions are expressed in tons per year (tpy). Nitrogen Oxides (NO<sub>x</sub>) at 1087 tpy (no change); Carbon Monoxide (CO) at 519 tpy (+3); Volatile Organic Compounds (VOC) at 78 tpy (-19); Sulfur Dioxide (SO<sub>2</sub>) at 0.2 tpy (no change); and Total Suspended Particulate Matter (TSP), Particulate Matter 10 microns or less (PM<sub>10</sub>), and Particulate Matter 2.5 microns or less (PM<sub>2.5</sub>) each at 5.2 tpy (no change). The facility is a minor, < 100,000 tpy CO<sub>2</sub>e, source of green house gas emissions.

The NMED has conducted a preliminary review of the information submitted with the permit application. This review included evaluation of the emission rates and applicable requirements to determine compliance status.

The NMED has made a preliminary determination that this plant will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 7, 61, 70, 71, 72, 73, 74, and 82; 40 CFR 50; 40 CFR 63 Subparts A and ZZZZ; 40 CFR 64; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality operating permit on or before March 23, 2011.

Interested persons may obtain the draft operating permit, submit written comments, or request a public hearing on Operating Permit Number P059R1M1. Contact the New

Mexico Environment Department, Air Quality Bureau, Operating Permit Unit, 1301 Siler Rd, Bldg B, Santa Fe, New Mexico 87507-3113.

Written requests for public hearing must state the nature of the issues proposed to be raised in the hearing. Comments must be based on the requirements of the applicable state and federal air quality regulations and the Clean Air Act. Comments or hearing requests must be received within 30 days after the public notice is published.

The permit application, draft permit and relevant supporting materials are currently available for review at the Air Quality Bureau, Operating Permits Unit, 1301 Siler, Bldg B, Santa Fe, New Mexico 87507-3113. The Department contact in Santa Fe is Elizabeth Kuehn at 505-476-4338.
