Enterprise Field Services LLC

Enterprise Field Services LLC, PO Box 4324, Houston, TX 77210 has submitted an air quality permit application to the New Mexico Environment Department (NMED) for an air quality permit to modify Gobernador/Manzanares Compressor Station. The application file has been assigned Permit No. 0742-M6 and TEMPO Agency Interest ID No. 989. The exact location of the Gobernador site is at latitude 36 deg., 46 min., 28.2 sec. and longitude -107 deg., 37 min, 3.9 sec. The exact location of the Manzanares site is at latitude 36 deg., 44 min., 52.3 sec. and longitude -107 deg., 40 min., and 32.1 sec. To aid in locating this facility, use the following driving directions: from Navajo City, travel north on NM-539 toward the Navajo Lake Dam for approximately 3 miles, turn east for 0.3 miles to the Gobernador site. The Manzanares site is located approximately 3.7 miles to the southwest. These facilities are located approximately 9 miles east-northeast of Blanco, New Mexico. The Manzanares site is in San Juan County, and the Gobernador site is in Rio Arriba County. The two facilities are considered a single source under the provisions of Prevention of Significant Deterioration (PSD).

The proposed modification will consist of the following:

- Increasing the allowable inlet gas pressure at the Manzanares site;
- Increasing the flash emissions and total throughput from the Manzanares site Tanks T-101;
- Increasing the truck loadout volume;
- Revision of SSM and Malfunction emissions;
- Reduction of instrument gas dryer emissions at the Manzanares site; and
- Revision of engine horsepower ratings to reflect altitude deration.

Total air pollutant emissions to the atmosphere are estimated to be approximately Nitrogen Oxides (NOx expressed as NO2) at 215.6 tons per year (tpy); Carbon Monoxide (CO) at 362.1 tpy; Volatile Organic Compounds (VOC) at 121.6 tpy; Sulfur Dioxide (SO2) at 6.8 tpy; Total Suspended Particulates (TSP) at 4.6 tpy; Particulate Matter less than 10 microns (PM10); Particulate Matter less than 2.5 microns (PM2.5); Formaldehyde (a Hazardous Air Pollutant, HAP) at 26.1 tpy; and Total HAPs at 39.5 tpy. The HAPs are included in the VOC total. These emission estimates could change slightly during the course of the Department's review of the application.

Based on the applicant’s analysis, a preliminary determination is that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 1.116, 3, 61, 70, 71, 72, 73, 74, and 75; 40 CFR 50; 40 CFR 60, Subparts A and OOOO; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality permit on or before June 9, 2011. This source is a major source according to 20.2.74 NMAC, PSD. This permitting action is a PSD minor modification.
To ensure compliance with state and federal air regulations, the permit is expected to include conditions that limit the emissions and production rate, and conditions that will require record keeping and reporting to the Department.

The permit application is currently available for review at the Air Quality Bureau Office, 1301 Siler Road, Building B, Santa Fe, New Mexico. The Department contact in Santa Fe is Coleman Smith. The permit application is also available at the NMED Farmington Office, located at 3400 Messina, Farmington, NM 87402 for public review.

All interested persons have thirty (30) days from the date this notice is published to notify the Department in writing of their interest in the permit application. The written comments should refer to the company name, site name and Permit No. (or send a copy of this notice along with your comments). The written comments shall state the nature of the issues raised and how it relates to the requirements of applicable state and federal air quality regulations and the Clean Air Act. The written comments should be mailed to Coleman Smith, New Mexico Environment Dept., Air Quality Bureau, Permit Section, 1301 Siler Road, Building B, Santa Fe, New Mexico 87507-3113.

The Department will notify all persons who have provided written comments as to when and where the Department’s analysis may be reviewed. Although all written comments will be made part of the public record, any person who does not express interest in writing prior to the end of this first thirty (30) day period will not receive such notification.

If the Department receives written public comment prior to the end of the Department’s thirty (30) day public notice, the Department’s analysis will be made available for review for thirty (30) days at the NMED district or field office nearest to the source before the permit will be issued. Written comments on the analysis or permit application may be submitted to the Department during this second thirty (30) day period or at any time before the permit is issued or denied.

Questions or comments not intended to be part of the public record can be directed to Coleman Smith at 505-476-5550. General information about air quality and the permitting process can be found at the Air Quality Bureau’s web site. The regulation dealing with public participation in the permit review process is 20.2.72.206 NMAC. This regulation can be found in the “Permits” section of this web site.

In accordance with 20.2.72.206.A.4 NMAC, a copy of the public notice will be sent to anyone of the Standing Notification List.
