PUBLIC NOTICE
For
Air Quality Operating Permit
for Hope Pump Station of NuStar Logistics, LP

NuStar Logistics LP at 410 S Padre Island Dr Suite 200; Corpus Christi, TX 78405 has submitted an air quality operating permit application to the New Mexico Environment Department (NMED) for its Hope Pump Station. The owner of this plant is NuStar Logistics LP. The exact location of the facility is/will be at latitude 32 deg, 51 min, 26.32 sec and longitude -104 deg, 56 min, 46.51 sec. To aid in locating this facility, the approximate location is 12.8 miles west of Hope in Chavez County, New Mexico 0.2 miles south of Highway 82. This application file has been assigned an Operating Permit Number P183R3 and TEMPO Agency Interest ID No. 52.

Previously, the facility received an air quality construction permit and is in operation.

The main purpose of the facility is to compress and transfer pipeline refined products from a refinery in Sunray, Texas, including gasoline, turbine fuel, diesel, ethanol, Jet-A, and liquefied petroleum gas. The Hope Pump Station primary emission sources are a diesel engine driven pipeline pump, a diesel storage tank for pipeline engine fuel and equipment fugitives. This operating permit application is for a permit renewal. Per 20.2.70.401.C.(4) NMAC, this permitting action involves the addition of a catalytic converter which significantly decreases carbon monoxide (CO) emissions from the diesel engine.

The estimated maximum air pollutant emissions to the atmosphere from this facility after the requested operating permit is issued are as follows. Parentheses note changes in emissions from previous operating permit P183-R2. Emissions are expressed in tons per year (tpy): Nitrogen Oxides (NOx) at 208 tpy (no change); Carbon Monoxide (CO) at 19.7 tpy (-46); Volatile Organic Compounds (VOC) at 14.7 tpy (no change); Sulfur Dioxide (SO2) at 34.2 tpy (no change); Particulate Matter 10 microns or less (PM10) at 0.3 tpy (no change), and Particulate Matter 2.5 microns or less (PM2.5); and greenhouse gas (CO2e) < 75,000 tpy. The facility is a minor (< 100,000 tpy CO2e), source of greenhouse gas emissions.

The NMED has conducted a preliminary review of the information submitted with the permit application. This review included evaluation of the emission rates and applicable requirements to determine compliance.

The NMED has made a preliminary determination that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 7, 61, 70, 71, 72, 73, 77, and 82; 40 CFR 50; 40 CFR 60 Subparts A and Kb; 40 CFR 63 Subparts A and ZZZZ; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality operating permit on or before June 6, 2015.

Interested persons may obtain the draft operating permit, submit written comments, or request a public hearing on Operating Permit Number P183R3 by contacting Maxine Paul at the New Mexico Environment Department, Air Quality Bureau, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816.

Written requests for public hearing must state the nature of the issues proposed to be raised in the hearing. Comments must be based on the requirements of the applicable state and federal air quality regulations and the Clean Air Act. Comments or hearing requests must be received within 30 days after the public notice is published.

The permit application, draft permit and relevant supporting materials are currently available for review at the Air Quality Bureau, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816. The Department contact in Santa Fe is Maxine Paul at 505-476-4349.
