PUBLIC NOTICE
For
Air Quality Operating Permit
for Horse Canyon Central Delivery Point of Williams Four Corners, LLC

Williams Four Corners, LLC at 188 County Road 4900; Bloomfield, NM 87413 has submitted an air quality operating permit application to the New Mexico Environment Department (NMED) for an air quality operating permit for its Horse Canyon Central Delivery Point. The owner of this plant is Williams Four Corners, LLC. The exact location of the facility is at latitude 36\textdegree, 47 min, 14 sec, and longitude -107\textdegree, 45 min, 37 sec. To aid in locating this facility, the approximate location is 10 miles east southeast of Aztec, or 12 miles northeast of Bloomfield, New Mexico (north of State Route 173). This application file has been assigned Operating Permit Number P035-R2-M2 and TEMPO Agency Interest ID No. 1274.

Previously, the facility received an air quality construction permit and is in operation (new source review [NSR] construction permit Nos. 868-M4 and 868-M5). The main purpose of the facility is to operate as a natural gas compressor station that receives field natural gas from a gathering system.

This operating permit application is for a permit modification. Per 20.2.70.401.C.(4) NMAC, this permitting action is incorporating NSR modifications, and associated applicable requirements of NSR Permit Nos. 868-M4 and 868-M5. The previous NSR actions being incorporated involved the removal of five compressor engines, removal of five dehydrators, increased startup, shutdown and maintenance (SSM) emissions from the remaining compressors, and added malfunction emissions (overall the facility reduced emissions).

The emissions, as established in NSR Permits 868-M4 and 868-M5, and brought forward into this permit are as follows. In parentheses note changes in emissions from the previous operating permit – P035-R2; emissions are expressed in tons per year (tpy): Nitrogen Oxides (NOx) at 183.1 tpy (-101.5); Carbon Monoxide (CO) at 321.6 tpy (-179.8); Volatile Organic Compounds (VOC) at 177.2 tpy (-32.7); Total Suspended Particulates (TSP) at 4.2 tpy (+4.2); Particulate Matter 10 microns or less (PM_{10}) at 4.2 tpy (+4.2), and Particulate Matter 2.5 microns or less (PM_{2.5}) at 4.2 tpy (+4.2). The facility is a minor, < 100,000 tpy CO_{2}e, source of greenhouse gas emissions.

The NMED has conducted a preliminary review of the information submitted with the permit application. This review included evaluation of the emission rates and applicable requirements to determine compliance.

The NMED has made a preliminary determination that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 7, 61, 70, 71, 72, 73, and 82; 40 CFR 50; 40 CFR 63 Subparts A and HH; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality operating permit on or before November 9, 2013.

Interested persons may obtain the draft operating permit, submit written comments, or request a public hearing on Operating Permit Number P035-R2-M2 by contacting Jim Nellessen at the New Mexico Environment Department, Air Quality Bureau, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816.

Written requests for public hearing must state the nature of the issues proposed to be raised in the hearing. Comments must be based on the requirements of the applicable state and federal air quality regulations and the Clean Air Act. Comments or hearing requests must be received within 30 days after the public notice is published.

The permit application, draft permit and relevant supporting materials are currently available for review at the Air Quality Bureau, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816. The Department contact in Santa Fe is Jim Nellessen at 505-476-4315.
