PUBLIC NOTICE

For
Air Quality Operating Permit
for Trunk B Compressor Station of Williams Four Corners, LLC

Williams Four Corners, LLC at 188 County Road 4900; Bloomfield, NM 87413 has submitted an air quality operating permit application to the New Mexico Environment Department (NMED) for an air quality operating permit for its Trunk B Compressor Station. The owner of this plant is Williams Four Corners, LLC. The exact location of the facility is at latitude 36 deg, 51 min, 48 sec, and longitude 107 deg, 41 min, 14 sec. To aid in locating this facility, the approximate location is 188 County Road 4900, Bloomfield, NM (or North from Aztec on Hwy. 550 approximately 2 miles to Hwy. 173 and turn right; drive 18 miles to Hwy. 511 (Sportsman) and turn left; drive 15.1 miles on Hwy. 511 to mile marker 23.1; at CR 4600 turn left and drive 4 miles; turn left and drive 0.1 mile to site). This facility is located approximately 13 miles NE of Blanco in San Juan County, New Mexico. This application file has been assigned an Operating Permit Number P178-R2M1 and TEMPO Agency Interest ID No. 1350.

Previously, the facility received an air quality construction permit and is in operation.

The main purpose of the facility is to receive coal seam natural gas from various producers, boost the pressure and send it on to the Milagro Gas Processing Plant. This site consists of seven (7) site-rated 1367-hp Waukesha 7042GL lean-combustion reciprocating engines and 15 liquid storage tanks. The engines are fueled exclusively by natural gas which has been dehydrated off-site. Each engine is equipped with a high-speed turbocharger and operates at 1200 rpm.

This operating permit application is for a permit modification. Per 20.2.70.401.C.(4) NMAC, this permitting action is to make the following modifications to the TV Operating Permit as authorized by the current construction permit (1832-M1R1): to add startup, shutdown and maintenance (SSM) emissions for the compressors and piping associated with the plant (Units 1a 1a 7a), and placed in the permit with a single emission cap; and to add malfunction emissions (M1) for a maximum of 10 tpy of VOC emissions from periodic venting of natural gas caused by malfunctions.

The estimated maximum air pollutant emissions to the atmosphere from this facility, after the requested operating permit is issued, and as established in NSR Permit 1832-M1R1 and brought forward into this permit are as follows. (Parentheses note changes in emissions from the previous operating permit (P178-R1), and emissions are expressed in tons per year (tpy)). Nitrogen Oxides (NOx) at 138.6 tpy (no change); Carbon Monoxide (CO) at 244.3 tpy (no change); Volatile Organic Compounds (VOC) at 124.4 tpy (+32.0); Particulate Matter 10 microns or less (PM_{10}) at 3.1 tpy (+0.3); Particulate Matter 2.5 microns or less (PM_{2.5}) at 3.1 tpy (+0.3). The facility is a major (>100,000 tpy CO_{2e}) source of green-house gas emissions at 101,416.2 tpy.

The NMED has conducted a preliminary review of the information submitted with the permit application. This review included evaluation of the emission rates and applicable requirements to determine compliance.

The NMED has made a preliminary determination that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 1, 2, 7, 61, 70, 71, 72, 73, 74; and with 40 CFR 50; 40 CFR 63 Subparts A & ZZZZ; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality operating permit on or before 9-17-2013.

Interested persons may obtain the draft operating permit, submit written comments, or request a public hearing on Operating Permit Number P178-R2M1 by contacting Cille Pritchard-Hoback at the New Mexico
Written requests for public hearing must state the nature of the issues proposed to be raised in the hearing. Comments must be based on the requirements of the applicable state and federal air quality regulations and the Clean Air Act. Comments or hearing requests must be received within 30 days after the public notice is published.

The permit application, draft permit and relevant supporting materials are currently available for review at the Air Quality Bureau, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816. The Department contact in Santa Fe is Cille Pritchard-Hoback at 505-476-4340.
