

PUBLIC NOTICE
For
Air Quality Operating Permit
for Cedar Hill Central Delivery Point of Williams Four Corners LLC

Williams Four Corners, LLC at 188 County Road 4900, Bloomfield, NM 87413 has submitted an air quality operating permit application to the New Mexico Environment Department (NMED) for an air quality operating permit for its Cedar Hill Central Delivery Point. The owner of this plant is Williams Four Corners, LLC. The exact location of the facility is at latitude 36 deg, 57 min, 7.0 sec and longitude -107 deg, 53 min, 43.2 sec. To aid in locating this facility, the approximate location is 9 miles northeast of Aztec, New Mexico in San Juan County. This application file has been assigned an Operating Permit Number P036R2M2 and TEMPO Agency Interest ID No. 1227.

Previously the plant received an air quality construction permit and is in operation. The main purpose of the plant is to dehydrate and compress natural gas through underground natural gas pipelines using reciprocating natural gas-fired engines.

This operating permit application is for a significant permit modification. Per 20.2.70.401.C.(4) NMAC, this permitting action involves incorporating modifications made to the NSR Permit 0923M4 and M5, including removing three glycol dehydrators, increasing the VOC emissions for the four remaining glycol dehydrators, and including existing startup, shutdown, maintenance and malfunction emissions.

The emissions, as established in NSR Permit 0923M5, and brought forward into this permit are as follows. Parentheses note changes in emissions from previous operating permit action – P036R2M1; Nitrogen Oxides (NO_x) at 81 tpy (no change); Carbon Monoxide (CO) at 142 tpy (no change); Volatile Organic Compounds (VOC) at 95 tpy (+12.5); Sulfur Dioxide (SO₂) at 0.1 tpy (no change); and Total Suspended Particulate Matter (TSP), Particulate Matter 10 microns or less (PM₁₀), and Particulate Matter 2.5 microns or less (PM_{2.5}) at 2.0 tpy each (no change). The facility is a minor, < 100,000 tpy CO_{2e}, source of green house gas emissions.

The NMED has conducted a preliminary review of the information submitted with the permit application. This review included evaluation of the emission rates and applicable requirements to determine compliance status.

The NMED has made a preliminary determination that this plant will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 7, 61, 70, 71, 72, 73, 77, 82; 40 CFR 50; 40 CFR 63 Subparts HH and ZZZZ; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality operating permit on or before November 11, 2011.

Interested persons may obtain the draft operating permit, submit written comments, or request a public hearing on Operating Permit Number P036R2M2. Contact the New

Mexico Environment Department, Air Quality Bureau, Operating Permit Unit, 1301 Siler Rd, Bldg B, Santa Fe, New Mexico 87507-3113.

Written requests for public hearing must state the nature of the issues proposed to be raised in the hearing. Comments must be based on the requirements of the applicable state and federal air quality regulations and the Clean Air Act. Comments or hearing requests must be received within 30 days after the public notice is published.

The permit application, draft permit and relevant supporting materials are currently available for review at the Air Quality Bureau, Operating Permits Unit, 1301 Siler, Bldg B, Santa Fe, New Mexico 87507-3113. The Department contact in Santa Fe is Elizabeth Bisbey-Kuehn at 505-476-4338.
